Projects

Employee Management System — React.js, Tailwind CSS, Context API, Local Storage

- Built a role-based Employee Management System using React.js and Tailwind CSS.
- Developed Admin and Employee dashboards with task assignment and tracking features.
- Implemented authentication and state management using React Context API.
- Integrated Local Storage for data persistence and session management.

Agency Website & Digital Agency Website

- Designed and implemented multiple sections, including Home, Services, Portfolio, and Contact pages.
- Created a clean, professional, and user-friendly interface to showcase digital agency services.
- Integrated smooth navigation and interactive user interface elements to improve engagement.
- Optimized website performance, accessibility, and cross-browser compatibility.
- Utilized Tailwind CSS to create a consistent design system with modern styling practices.

Razorpay Website — HTML, CSS.

- Built a responsive Razorpay landing page clone achieving mobile responsiveness and optimized loading performance
- Utilized Tailwind CSS utility classes for efficient styling and component-based design.
- Followed responsive web design principles and optimized page structure for better performance.
- Added smooth hover effects, transitions, and interactive UI elements to enhance user experience.

Certifications

- **Networking Basics Certificate** - Cisco Networking Academy
- **Problem Solving (Leetcode)** — C++ & Data Structures and Algorithms

Extracurricular Activities

- **Volunteer College Technical Cultural Event:** Coordinated event logistics and crowd management for Byte Battle, a college technical/cultural event, in 2023, enhancing teamwork and organizational skills
